Market (US\$)	2 209.84	2 028.59	8.93
Statutory (ZAR)	42 039.55	39 070.03	7.60

1. Figures might not add up due to rounding.
2. Foreign exchange reserves include foreign currency deposits received (FDR).
3. FDR balances include the foreign loans and foreign exchange purchases by the National Treasury (NT), both through outright purchases and foreign exchange swaps.
4. The forward position mainly reflects outstanding foreign exchange forward transactions. These include foreign exchange swaps to sterilise foreign exchange purchases and liquidity management swaps.
5. Sterilisation foreign exchange swaps refers to swaps conducted to sterilise foreign exchange purchases from foreign direct investments and other foreign exchange inflows, such as from International Finance Institutions (IFI'S).
6. Liquidity management swaps refers to foreign exchange swaps conducted in the normal course of business to manage money market liquidity.

The increases in the gross reserves and international liquidity position were mainly due to the increase in the US dollar gold price, asset price movements and a foreign currency loan received on behalf of government amounting to CAD 120 million. These factors were partially offset by the valuation adjustments due to the appreciation of the US dollar and foreign exchange payments made on behalf of government.
