Definition**Direct investment relationship**

A direct investment relationship is established when a direct investor (i.e. an individual, enterprise or group of related enterprises) resident in one country owns 10 per cent or more of the ordinary shares or voting stock of an enterprise resident in another country. Direct investment enterprises comprise those entities that are subsidiaries (a non-resident investor owns more than 50 per cent), associates (an investor owns 50 per cent or less) and branches (wholly or jointly owned unincorporated enterprises) either directly or indirectly owned by the direct investor. It is important to note that direct investment comprises not only the initial transaction establishing the relationship between the investor and the enterprise, but also all subsequent transactions between them and among affiliated enterprises, both incorporated and unincorporated.
